SUNNY PANCHAL

Software Engineer
Ahmedabad, Gujarat, India • +91-76230 74630 • panchalsunny785@gmail.com • linkedin.com/in/sunny9699 • github.com/sunny9699 • sunny9699.github.io

SUMMARY

Software Engineer with 4+ years of experience designing, building, and optimizing REST and GraphQL APIs, microservices, and cloud-native/serverless applications using **Node.js, Express.js, and NestJS**. Skilled in event-driven architecture with AWS SQS, caching strategies with Redis, database indexing and query optimization, API security (JWT, OAuth), and unit and integration testing with Jest. Delivered CRM, loan origination, and school-management platforms on relational and NoSQL databases (PostgreSQL, MySQL, MongoDB, DynamoDB), deployed on AWS with CI/CD practices.

TECHNICAL SKILLS

Backend Development: Node.js, Express.js, NestJS, RESTful APIs, GraphQL, Microservices, Event-Driven Architecture, WebSockets, Socket.IO, Serverless Architecture, System Design, Design Patterns, SOLID Principles

Languages: JavaScript (ES6+), TypeScript, SQL

Databases & ORMs: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB, Sequelize, TypeORM, Mongoose, Database Indexing, Query Optimization

Caching & Messaging: Redis Caching, AWS SQS, Message Queues, Asynchronous Background Workers

AWS & DevOps: AWS Lambda, API Gateway, S3, EC2, RDS, SQS, ECR, Elastic Beanstalk, Amplify, Serverless Framework, Docker, CI/CD, Linux

Security & Testing: JWT, OAuth, Authentication and Authorization, Middleware, CORS, Unit Testing, Integration Testing, Jest, Postman, Swagger/OpenAPI

Tools & Collaboration: Git, Bitbucket, VS Code, Adminer, MySQL Workbench, pgAdmin, Jira, Asana, Trello, Agile/Scrum

Frontend Familiarity: React.js, HTML, CSS

PROFESSIONAL EXPERIENCE

MindInventory, Ahmedabad, Gujarat — Oct 2024 – Present
Software Engineer

- Build and maintain scalable backend services for internal and client-facing products using Node.js, NestJS, and Express.js.
- Integrated AWS Lambda, S3, API Gateway, RDS, and SQS to deliver cloud-native APIs, database-backed services, and asynchronous message processing.
- Reduced REST API response time by approximately 30% through query optimization, database indexing, and Redis caching.
- Implemented JWT-based authentication and custom middleware to secure API endpoints and protect sensitive application workflows.
- Designed APIs, debugged production issues, and delivered features across multiple product workflows.

AIPXperts Technolabs, Ahmedabad, Gujarat — Dec 2023 – Oct 2024
Software Engineer

- Architected modular backend services with NestJS and GraphQL, applying SOLID principles and design patterns for maintainability.
- Deployed and supported microservices on AWS, improving scalability, availability, and reliability.
- Wrote unit and integration tests with Jest for core backend modules.
- Built event-driven background processing with AWS SQS and asynchronous workers for long-running tasks.

Full Stack Technology LLP, Gandhinagar, Gujarat — Apr 2022 – Oct 2023
Software Engineer

- Built automated data-extraction pipelines with Node.js and Puppeteer, processing and storing scraped data at scale.
- Improved pipeline reliability by implementing error handling and retry logic for failure-prone workflows.
- Designed and managed data storage in MongoDB and MySQL using team-defined schemas.
- Validated data accuracy and pipeline stability through manual and automated test cases.

PROJECTS

CollabCRM, *Customer Relationship Management Platform*

- Built serverless backend functionality for CRM workflows covering employee, project, sales, and recruitment operations.
- Delivered Kanban-style project tracking and real-time notifications using AWS API Gateway WebSocket, improving team visibility and collaboration.
- Developed API and event-driven features using AWS Lambda, PostgreSQL with Sequelize, and DynamoDB.

  Technology: Node.js, React.js, PostgreSQL, Sequelize, DynamoDB, AWS Lambda, API Gateway WebSocket, Serverless Framework

Loan Origination System, *Lending Platform*

- Developed loan-origination workflows in Node.js, integrating a third-party credit-score API for eligibility checks, income verification, and dynamic loan-offer generation.
- Secured loan application documents and audit logs in AWS S3 with server-side encryption; stored relational data in PostgreSQL on Amazon RDS.

  Technology: Node.js, AWS Lambda, AWS S3 (server-side encryption), PostgreSQL, Amazon RDS, Third-Party Credit Score API

The Modern Schoolhouse, *School Management Platform*

- Developed backend features for parent-teacher communication, lessons, announcements, and user management.
- Implemented real-time chat with Socket.IO and WebSockets, and supported deployment of the NestJS backend on AWS.

  Technology: NestJS, React.js, PostgreSQL, Sequelize, Socket.IO, Redis, AWS

EDUCATION

Government Engineering College, Gandhinagar, Gujarat 2018 – 2022
B.E. in Computer Engineering, Gujarat Technological University — CGPA: 8.01/10

CERTIFICATION

Back-End Infrastructure: Servers, Secure APIs and Data, Coursera March 2026
